

Acknowledgments

This local water management plan is a joint effort prepared on behalf of 12 rural Dakota County communities located in the Vermillion River Watershed. Funding for the collaborative plan was provided in part by a grant from the Metropolitan Council through Dakota County and in part by a U.S. Department of Housing and Urban Development Community Development Block Grant through the Dakota County Community Development Agency.

Guidance and oversight in the development of the plan was provided by staff of the Vermillion River Watershed Joint Powers Organization (VRWJPO). Staff from the Dakota County Office of Planning also customized the maps from the VRWJPO Watershed Plan for the Rural Collaborative Local Water Management Plan.

Members of the Rural Collaborative and community liaisons for the development of the Collaborative Plan include:

Castle Rock Township
Coates City
Douglas Township
Empire Township
Eureka Township
Hampton City
Hampton Township
Marshan Township
Nininger Township
Ravenna Township
Vermillion City
Vermillion Township
Township Association
VRWJPO Staff
Dakota County Planning
Metropolitan Council
Planning Consultant

TABLE OF CONTENTS

Executive Summary	ES-1
Rural Collaborative Plan	ES-1
Vermillion River Watershed Location and History	ES-2
Water Management Purposes	ES-2
Water Management Plan Term Definitions	ES-3
Watershed Issues	ES-4
Watershed Goals	ES-5
Plan Content	ES-5
1 Existing and Future Environment	1-1
1.0 Introduction	1-1
1.0.1 Rural Collaborative	1-1
1.0.2 Purpose	1-3
1.0.3 Methodology	1-3
1.0.4 Scope and Authority	1-5
1.1 Physical Environment	1-5
1.2 Biological Environment	1-13
1.3 Human Environment	1-21
2 Water Resources	2-1
2.0 Introduction	2-1
2.1 Climate	2-1
2.2 Surface Water Resources	2-3
2.3 Groundwater Resources	2-40
3 Issues Identification	3-1
3.0 Introduction	3-1
3.1.1 River Flow Volumes have Increased	3-3
3.1.2 Surface Water Quality is Threatened or Impaired	3-3

3.1.3	The Vermillion River Channel/corridor is impacted and Sensitive to Disturbance	3-4
3.1.4	Sensitive Resources are Present and/or Impaired	3-5
3.1.5	Groundwater Quality is Threatened or Impaired	3-5
3.1.6	Additional Development is Expected	3-6
3.1.7	Data for Making Informed Decisions is Limited	3-8
3.1.8	Public Awareness about Water Resources and Appropriate Stewardship is Limited	3-9
4	Goals, Policies, Objectives, and Actions	4-1
4.0	Introduction	4-1
4.1	Surface Water Quality	4-1
4.1.1	Surface Water Quality Collaborative Matrix	4-8
4.2	Surface Water Quantity	4-9
4.2.1	Surface Water Quantity Collaborative Matrix	4-14
4.3	Groundwater	4-15
4.3.1	Groundwater Collaborative Matrix	4-20
4.4	Wetlands and Habitat	4-21
4.4.1	Wetlands and Habitat Collaborative Matrix	4-25
4.5	Floodplains	4-26
4.5.1	Floodplains Collaborative Matrix	4-28
4.6	Land Use Management	4-29
4.6.1	Land Use Management Collaborative Matrix	4-34
4.7	Open Space and Recreational Areas	4-35
4.7.1	Open Space and Recreational Areas Collaborative Matrix	4-38
4.8	Education	4-39
4.8.1	Education Collaborative Matrix	4-43
5	Implementation	5-1
5.0	Rural Collaborative Implementation	5-1
5.1	Capital Improvement Plan	5-4
5.2	VRWJPO Cost Sharing Policy	5-5
5.3	Impact of Collaborative Plan Implementation on Residents	5-8
5.4	Collaborative Plan Amendment Process	5-8

Figures

1.1	7-County Metro Location	1-2
1.2	Rural Collaborative Location	1-4
1.3	Surficial Geology	1-6
1.4	Bedrock Geology	1-8
1.5	Depth to Bedrock	1-9
1.6	Geologic Formations	1-10
1.7	Hydrological Soil Groups	1-11
1.8	High Infiltration Soils	1-12
1.9	Hydric Soils	1-14
1.10	Highly Erodible Soils	1-15
1.11	Pre-Settlement Vegetation	1-17
1.12	Sensitive and Natural Areas	1-18
1.13	Designated Trout Waters	1-19
1.14	2000 Land Use	1-23
1.15	Planned Land Use	1-25
1.16	Registered Irrigation Wells	1-26
1.17	Well Inventory	1-27
1.18	Recreational Facilities	1-28
1.19	Aggregate	1-30
1.20	Mining and Wastewater	1-31
1.21	Environmental Hazards	1-33
1.22	Feedlots	1-35
2.1	Topography and Drainage	2-4
2.2	DNR Protected Waters Index	2-6
2.3	Wetlands	2-7
2.4	100-year Floodplain	2-8
2.5	Water Flow Monitoring Stations	2-12
2.6	Volume Comparison	2-15
2.7	Annual Precipitation	2-16
2.8	Stormwater Management Strategies	2-18
2.9	Annual Mean Flow and Range – Empire Gauge	2-20
2.10	Historical Volume Analysis – Empire Gauge	2-21
2.11	Flow/Bank – Full Flow at Empire Gauge	2-22
2.12	Development on High Infiltration Soil	2-26
2.13	Water Quality Monitoring Stations	2-29

Figures cont.

2.14	Mean Flow Data	2-30
2.14.1	Impaired Waters	2-32
2.15	Geometric Mean Fecal Coliform Bacteria Levels	2-35
2.16	Geometric Mean Fecal Coliform Bacteria Levels – Low Flow/Runoff Events	2-36
2.17	Average Total Phosphorous Concentrations	2-37
2.18	Average Total Phosphorous Concentrations – Low Flow/Runoff Events	2-38
2.19	Average Nitrate Concentrations	2-39
2.20	Average Nitrate Concentrations – Low Flow/Runoff Events	2-39
2.21	Average Turbidity	2-40
2.22	Average Turbidity – Low Flow/Runoff Events	2-40
2.23	Average Total Suspended Solids	2-41
2.24	Average Total Suspended Solids – Low Flow/Runoff Events	2-41
2.25	Aquifers	2-51
2.26	Quaternary Hydrology	2-53
2.27	Hans Monitoring Wells	2-57
2.28	Changes in Water Table vs. River Between Vermillion and Hastings	2-58
2.29	Static Water Levels – Ground Water in Monitoring Wells	2-59
2.30	Monitoring Well Nitrate Levels over Time	2-60
2.31	Geologic Formations	2-61
2.32	DNR Water Appropriations Permit Locations	2-62
2.33	DNR Water Appropriations Permit Volumes	2-63
2.34	Groundwater Sensitivity	2-64
3.1	Conceptual Issues Model	3-2

Tables

ES.1	General Vermillion River Watershed Information	ES-1
ES.2	Vermillion River Watershed Management Plan Definitions	ES-3
ES.3	Vermillion River Watershed JPO Goals	ES-5
1.1	Local Government Units in the Vermillion River Watershed	1-1
1.2	Vermillion River Watershed Wastewater Treatment Plant Information	1-29
2.1	1971-2000 Temperature Normals in the Vermillion River Watershed	2-1
2.2	1971-2000 Precipitation Normals in the Vermillion River Watershed	2-2
2.3	Rainfall for Durations from 15 Minutes to 24 Hours and Return Frequency	2-2
2.4	Physical Lake Characteristics	2-5

Tables cont.

2.5	Erosion Repair Properties	2-10
2.6	100-year Discharges (existing and 2040 without future stormwater management)	2-13
2.7	Existing and Future Flows with Stormwater Management at Varying Storm Events	2-23
2.8	Existing and Future Peak Flows with Stormwater Management at Varying Storm Events	2-24
2.9	Annual Mean Streamflow at USGS Empire Gauge	2-28
2.10	Annual Mean Streamflow at Highway 61 Gauge	2-28
2.11	Provisional Mean Flow Data from JPO Monitoring Network	2-30
2.12	2004 Final Impaired Waters List	2-33
2.13	Relative Load in Subwatersheds and Overall Ranking of Sources	2-35
2.14	Vermillion River Historical Water Quality, MCES Monitoring Data	2-42
2.15	Vermillion River Watershed Lakes Data Sources	2-44
2.16	Alimagnet Lake Water Quality Goals and Status, 1991 Clean Lakes Study	2-46
2.17	Water Quality Summary for Vermillion River Watershed Lakes	2-46
2.18	Empire WWTP Discharge Summary 1992-2002 (Ranges of Values and Exceedences)	2-48
2.19	GWMAP Dakota County Aquifers Sampled	2-61
2.20	Minnesota Department of Agriculture Nitrate Clinic Summary	2-65

Collaborative Goals, Objectives, and Actions Matrices

4.1.1	Surface Water Quality	4-8
4.2.1	Surface Water Quantity	4-14
4.3.1	Groundwater	4-20
4.4.1	Wetland and Habitat	4-25
4.5.1	Floodplains	4-28
4.6.1	Land Use Management	4-34
4.7.1	Open Space and Recreational Areas	4-38
4.8.1	Education	4-43
